

CAMERAS & DETECTION  
A RONIN SOLUTION

**ART<sup>®</sup> Alarm**  
After Hours Loss Management

**Ronin<sup>®</sup>**

**STOP after-hours commodity theft with the Ronin<sup>®</sup>ART<sup>®</sup>ALARM security solution. ART<sup>®</sup>ALARM is a robust, reliable and cost effective system designed to operate unobtrusively in all weather conditions.**

**ART ALARM** utilises infrared cameras and motion sensors placed at key points around the storage facility to ensure that your bulk commodity remains secure. The system is designed to interface with Ronin's **ART software** and thus offers head office awareness of after-hour inventory movements. The system will also send out a silent alarm whenever movement is detected at key points around the storage facility. Video recorded is instantly viewable online. **ART<sup>®</sup>ALARM** can be installed within 4 to 5 working days. **Contact Ronin<sup>®</sup>GMS** for a quotation and **STOP** after hour losses today!
