

BULK QUANTITY SURVEY SOLUTION

A FAST, ACCURATE AND COST EFFECTIVE BULK QUANTIFICATION SOLUTION

WHAT DOES Aims DO?

Accurately determine the exact volume of collateral bulk in storage.

By choosing the AIMS solution you can obtain accurate moment in time audits, displacement audits as well as supply verification audits. These audits are of great value to all bulk commodity handlers since ships, railway and road transport can be planned with ease and reconciliations can be done with accuracy.

AIMS is the ideal solution for bulk quantity surveying and the moment in time audit of bulk commodities stored within silo bins, on stock piles and in bunkers or warehouses.

AIMS GIVES YOU:

- Volumetric Audits
- Bulk Density Verifications
- 3D Surface Maps
- Height Graphs
- Volume & Mass

THE AIMS REPORT

Once a survey has been completed an AIMS Audit Report will be supplied.

Typically an AIMS report will contain a 3D surface map and height graphs along with relevant information such as bulk densities, tonnages and volumes. Depending on scope of work reports are usually generated within 24 hours.

AUDIT REPORTS
