

SINAR
TECHNOLOGY

- Extremely easy to use
- Rugged, portable design
- No grinding necessary
- Clear digital readout
- Averaging facility
- Precalibrated for 9 crops Automatic temp compensation
- Complete with carry case

Sinar Agripro Moisture Analyser - Accurate Results In Seconds

Sinar Technology have been manufacturing moisture meters in the UK for over 25 years. Our instruments have become a byword for accuracy, being used by professional farmers and merchants throughout the World.

All this experience has gone into designing the Sinar Agripro whole grain moisture meter, the ideal tool for checking the moisture of your cereals, pulses or oilseeds wherever you need to measure it.

The Sinar Agripro is extremely easy to use - simply pour the grain into the measurement cell, screw down the compression lid and read off the moisture content from the backlit digital display.

TECHNICAL SPECIFICATIONS

Order Code	6095-001AG
Moisture range	5% - 45 % (independent upon application)
Operating Temp. Range	0-45°C
Readout Resolution	0,1% Moisture
Temperature comp.	Automatic
Size	21 x 7,5 x 7,5cm
Weight inc. Carry case	1,5kg
Battery	Alkaline
Accuracy	Better than 0,5%mc (independent upon application)
